MONTAGENS

ASSEMBLIES | ASSEMBLAGES

Passo | Step | Étape 1:

Aplicar o Perno na Chapa de fixação do batente.

Apply the Threaded pin to the Opening limiter fixing plate.

Appliquer le Bout cuvette sur la Plaque du Limiteur d'ouverture.

**Passo | Step | Étape 2:**

Posicionar a Chapa por baixo da soleira, fazendo passar o perno pelo furo. Aparafusar os 2 parafusos para fixar a chapa até à obra.

Position the Plate under the sill, passing the threaded pin through the hole. Screw in the 2 screws to secure the plate to the work.

Positionner la Plaque sous le seuil en passant la bout cuvette dans le trou. Visser les 2 vis pour fixer la plaque à l'ouvrage.

**Passo | Step | Étape 3:**

Em obra, com as folhas já aplicadas, remover os parafusos, posicionar o batente e fixá-lo com os parafusos que se tiraram.

On site, with the sashes already applied, remove the screws, position the opening limiter and secure it with the screws that were removed.

Sur place, les vantaux étant déjà appliqués, retirer les vis, positionner le limiteur d'ouverture et la fixer avec les vis retirées.

**Passo | Step | Étape 4:**

Aplicar a tampa.

Apply the cover.

Appliquer le couvercle.

A posição do Conj. Batente Inferior deverá ser respeitada, de forma a que a folha não torça.

Abaixo relembra-se a posição do Batente superior.

The position of the Lower Stop Assembly must be respected, so that the leaf does not twist.

Below is a reminder of the position of the upper stop.

La position de l'ensemble butée inférieure doit être respectée, afin que le vantail ne se torde pas.

Ci-dessous un rappel de la position de la butée haute.
